

ANALYSIS REPORT

Doc nr: AR_19MO055_FP_FLUSHOT

SUMMARY:

This analysis report has been prepared by producer's analytical department.

PROCEDURE:

Identification and quantification of cannabinoids has been performed via HPLC-UV analysis according to producer's analytical methods.

Samples are analysed in duplicate. The data is reported when the duplicate analysis showed that:

- the 6 standards used in the sequence have a RSD% <2%
- the main component has a RSD% <5%
- other quantified components have a RSD% <10%
